

Mostafa Ali Shaker

Full-Stack Developer

mostafaalishaker@gmail.com

Egypt

portfolio • github • linkedin

Mechatronics Engineering student at Sphinx University with 5 years of hands-on full-stack development experience. Built and deployed 9 production-grade projects spanning AI (GPT-4o), real-time systems (Socket.io), e-commerce (Angular 18), and SaaS platforms. Proficient across React, Angular, Node.js, TypeScript, and MongoDB with strong foundations in authentication, API design, and CI/CD.

TECHNICAL SKILLS

React

Angular

TypeScript

JavaScript

Node.js

Express

MongoDB

TailwindCSS

REST APIs

Socket.io

JWT/OAuth

Stripe

OpenAI API

Prisma

Git/GitHub Actions

Vite

ASP.NET Core

SQL Server

HTML/CSS

CI/CD

PROJECTS

AI Study Buddy github.com/mostafaalishaker-stack/ai-study-buddy

React • Node.js • OpenAI GPT-4o • TailwindCSS

- Built an AI-powered study platform with 3 core features: intelligent explanations, auto-generated quizzes, and interactive flashcards using GPT-4o
- Designed RESTful API with rate limiting (100 req/min), JWT authentication, and input validation for production readiness
- Implemented skeleton loading, pagination (10 items/page), and responsive design for optimal UX across devices

AI Chat App github.com/mostafaalishaker-stack/ai-chat-app

React • Node.js • OpenAI • MongoDB • JWT

- Developed a multi-session GPT-4 chat app with streaming responses, conversation history, and markdown rendering
- Integrated OpenAI API with token management, reducing API costs by optimizing prompt context windows
- Added health check endpoint, Helmet security headers, and comprehensive error handling middleware

AI Resume Analyzer github.com/mostafaalishaker-stack/ai-resume-analyzer[React](#) • [Node.js](#) • [GPT-4o-mini](#) • [Express](#)

- Built an AI resume analysis tool that scores resumes, extracts skills, and generates improvement suggestions
- Implemented PDF upload with multer, file validation (max 5MB, PDF only), and structured AI feedback formatting
- Designed responsive UI with empty states, skeleton loading, and toast notifications for a polished user experience

E-Commerce Platform github.com/mostafaalishaker-stack/ecommerce-platform[Angular 18](#) • [Node.js](#) • [MongoDB](#) • [TailwindCSS](#)

- Built a full online store with product catalog, shopping cart, checkout flow, order management, and admin dashboard
- Implemented JWT authentication with role-based access (admin/user), input sanitization, and rate limiting on all API routes
- Added search with debounce, category filtering, pagination (12 products/page), and responsive grid layout

Social Platform github.com/mostafaalishaker-stack/social-platform[React](#) • [Node.js](#) • [Socket.io](#) • [MongoDB](#) • [JWT](#)

- Built real-time social platform with live feed, instant messaging via Socket.io, friend system, and push notifications
- Optimized WebSocket connections with event debouncing, reducing server load by managing connection pools efficiently
- Implemented file upload with image validation, toast notifications for real-time events, and skeleton loading states

Kanban Task Manager github.com/mostafaalishaker-stack/kanban-task-manager[React](#) • [Node.js](#) • [Prisma](#) • [MongoDB](#) • [JWT](#) • [TailwindCSS](#)

- Developed a drag-and-drop kanban board with task management, team collaboration, and real-time updates
- Designed database schema with Prisma ORM, implementing cascading deletes and optimized queries for sub-200ms responses
- Added role-based access control, activity logging, search/filter by status/priority, and paginated task views

SaaS Dashboard github.com/mostafaalishaker-stack/saas-dashboard[React](#) • [Node.js](#) • [Stripe](#) • [Express](#) • [JWT](#)

- Built multi-tenant SaaS platform with Stripe subscription billing (monthly/annual), webhook handling, and invoice management

- Implemented analytics dashboard with interactive charts, user management with role-based permissions, and admin panel
- Added rate limiting (200 req/15min), Helmet security headers, CORS configuration, and input validation across all endpoints

Job Board Platform github.com/mostafaalishaker-stack/job-board

[React](#) • [Node.js](#) • [Express](#) • [MongoDB](#) • [JWT](#)

- Created a job listing platform with search, category/type/location filtering, paginated results, and employer/job-seeker workflows
- Implemented application tracking system with resume upload, status updates, and email notifications on application changes
- Added data validation, rate limiting, security headers, and health monitoring endpoint for production reliability

Finance Tracker github.com/mostafaalishaker-stack/finance-tracker

[React](#) • [Node.js](#) • [Express](#) • [MongoDB](#) • [JWT](#)

- Built personal finance manager with income/expense tracking, budget management, interactive charts (Chart.js), and CSV export
- Added recurring transaction detection, category management, and monthly spending summaries with visual breakdowns
- Wrote unit tests using Vitest + Testing Library (Skeleton, EmptyState components), achieving reliable component coverage

EDUCATION

Sphinx University

B.Sc. in Mechatronics Engineering — Faculty of Engineering

2024 – Present

CERTIFICATIONS

- The Complete Web Development Bootcamp — Udemy
- React - The Complete Guide — Udemy
- Node.js, Express, MongoDB & More — Udemy

LANGUAGES

- **Arabic** — Native
- **English** — Fluent (Technical & Professional)
